

Third Quarter Report, 2002 - Juvenile Hall Data

Gender Distribution in Juvenile Halls

There had been a small, gradual increase in the percentage of females in Juvenile Halls. Jails are experiencing a similar increase. Despite the fact that the percentage of females has been small since the 1st Quarter of 1999 to the present (from 15% to 18%), this trend represents an increase of about 200 females in Juvenile Hall since 1999. Continued increases could have huge implications for the costs associated with construction and/or modification of facilities suitable for housing females.

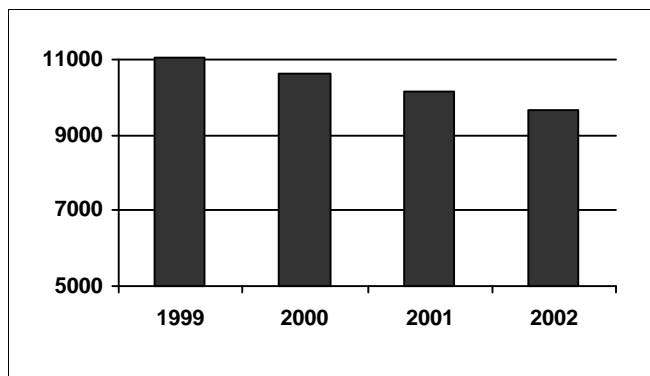

Summary of Males in Juvenile Halls

Q1	Q2	Q3		Average
82%	82%	82%		82%

Average Number of Juveniles Booked per Month

The most dramatic long-term trend identified by the Juvenile Detention Survey involves the number of juveniles booked into Juvenile Hall. The highest recorded number of bookings occurred in the 2nd Quarter of 1999 (11,252 bookings per month). Since then, the bookings have decreased in an almost perfect straight-line fashion to 8,991 in the 3rd Quarter of 2002. Obviously, this trend will turn around and bookings will increase (if for no other reason than the population of the State continues to increase in a steady fashion). In terms of long range planning, it is important to note that after a period of steady decreases in Juvenile Hall bookings, the Highest One-Day population still exceeds Juvenile Hall capacity. As soon as bookings begin to rise again, we will immediately experience crowding, once again.

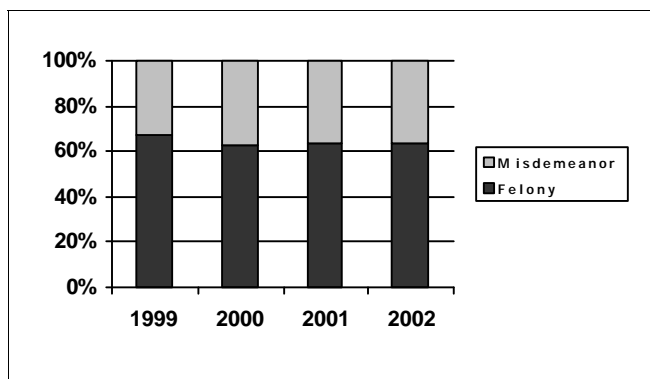

Summary of Juveniles Booked per Month

1999	2000	2001		
11,067	10,641	10,137

Q1	Q2	Q3		Average
9,906	10,209	8,991		9,699

Distribution of Charge in Juvenile Halls

If Juvenile Hall populations are declining due to budgetary problems, one would expect that priority would be given to detaining the most serious offenders. As a result, the percentage of juveniles with felony charges would increase. This has not occurred. The percentage of juveniles with felony charges has remained at 63-64% for the last three years. Further investigation will be required to determine why the expected rise in the percentage of juveniles with felony charges has not occurred.
